Kod producenta	107865
Kod EAN	8581701078656
Producent	HUDY
Kategorie produktów HUDY	Narzędzie i przyrządy

Opis produktu

With weight measurement and management being critical for modern RC cars (considering the abundance of strict racing regulations), the new HUDY Pocket Scale represents a new level of sophistication in precision and high-tolerance electronics (0.01g/0.001oz) for the most detail-oriented racer.

Compact and light and powered by easy-to-obtain AAA batteries (not included), the Pocket Scale provides the means for highly accurate and precise weight measurement on your workbench or in your pit at any race from club-level to international-level. From chassis trim weight measurement (to ensure adherence to racing regulations) to tire weight measurement (to balance the four corners of your on-road or off-road vehicle), the Pocket Scale offers easy-to-use and intuitive controls, auto-calibration, and an easy-to-read backlit LCD display. Whether it be static weighing or tare weighing, the HUDY Pocket Scale is a high-precision instrument to enhance your racing experience.

Note: Batteries are not included
