Kod EAN	8581702934913
Producent	HUDY
Kategorie produktów HUDY	Orczyki do serw

Opis produktu

CNC-machined alu servo horn with offset for use on steering servos. Alu servo horn offers maximum steering control by eliminating the flex often associated with composite servo horns. Drilled and tapped for 3mm-linkage hardware. Two holes for linkage mounting allows quick & easy linkage angle change. Primarily recommended for 1/10 and 1/8 on-road nitro cars.

Notice:

The 25T servo horn for Futaba does not fit new Futaba servos which have brushless motors. Also, this servo horn is not suitable for and will not fit Savox servos.

UPDATE:

The V2 version of the 25T servo horn has a new updated design which will allow it to fit Futaba servos that have brushless motors.
