Opis produktu

Alu flex chassis is recommended for high traction carpet tracks. Makes the car easier to drive and more stable in high traction condition and avoids traction rolling. Chassis is 2mm thick, made from 7075 T6 aluminum and features special cut outs for optimal flex characteristics. The ultra-narrow chassis is only 84mm wide and features special cut outs that provide the chassis flex characteristics suitable for a wide variety of the traction levels. The bottom of the chassis is shaped to reduce contact between the chassis and the ground while turning to improve cornering speed.
