Opis produktu

Set of CNC-machined FRP chassis and front/rear upper decks for T2R PRO.

The main advantage of the FRP material is its flex allowance. Due to the flex, the chassis and top decks create more traction and stability on low-traction asphalt tracks compared to standard graphite material.

Knowing that every small detail impacts the handling and performance of a high-performance car, XRAY CNC-machines every chassis in-house using the most modern German milling machines. fully robotically-operated and controlled to ensure that every chassis meets the tightest manufacturing tolerances.

Fits: XRAY T2'009, T2'008, T2R PRO
