Opis produktu

CNC-machined 6-cell chassis of 3.0mm thick, premium-grade graphite material, specially designed and optimized for foam-tire racing. Features slots for 6-cell batteries. Accommodates 5- or 6-cell NiMH battery packs or a single LiPo battery. Fits XRAY T3.

The thick chassis gives the car super-stiff torsion and flex that are essential for high-competition foam-tire racing.

Knowing that every small detail impacts the handling and performance of a high-performance car, XRAY CNC-machines every chassis in-house using the most modern German milling machines... fully robotically operated and controlled to ensure that every chassis meets the tightest manufacturing tolerances.
