### Opis produktu

**CNC-machined chassis of premium-grade 2.5mm thick graphite material. Specifically designed for LiPo batteries, all electronics are located along the centerline to make this the best-balanced electric touring car. The 94mm wide chassis features pre-drilled holes for optional central chassis weights.**

**The high-grade, custom-manufactured carbon graphite is specially produced based on XRAY's own recipe and specifications.**

**Knowing that every small detail impacts the handling and performance of a high-performance car, all XRAY graphite parts are CNC-machined in-house using state-of-the-art fully automatic German CNC-milling machines to ensure the tightest tolerances and highest manufacturing quality. These are fully robotically operated and controlled to ensure that every chassis meets the tightest manufacturing tolerances.**
