Opis produktu

All-new T4'17 chassis made from 2.2mm premium-grade graphite material was redesigned to fit the new all-new inline chassis flex system adjustment. The new chassis design allows mounting of the new servo holder into the absolute center of the chassis (and includes new centric positions which prevents the servo from moving in hard crashes).

The chassis also includes new positions for alu steering posts for dual servo saver.

To guarantee equal chassis flex characteristics, the motor cut outs in the chassis are now milled on both left and right sides
