### Opis produktu

**The T4'19 chassis was redesigned to accommodate the new front chassis brace. The front brace - which can be easily installed on the chassis with two screws - eliminates side flex at the front of the chassis, improving steering response and making the car more predictable.**

**The 2.2mm thick chassis is CNC-machined from premium-grade graphite material. The chassis features pre-drilled holes for optional parts such as chassis weights, graphite motor guard, graphite adjustable battery holder, and battery strap.**

**The ultra-narrow chassis is only 86mm wide, and includes a variety of chassis flex adjustments to generate exceptional traction and give excellent steering characteristics.**
