Opis produktu

Molded composite front lower suspension arm made from hard material. 2mm longer to better fit new suspension mounts. Fits T4'14.

After extensive testing of many different composite mixtures, the factory team identified this new blend as the optimum choice for mass production. The new hard suspension arm is specifically designed to be used in extremely hot conditions to reduce flex and deformation; however due to reduced flex, the arms are less resistant to extreme impacts.

Redesigned to allow mounting of optional # 302190 graphite plate, the new arms include 4 reinforced holes.
