Czas wysyłki	24 godziny
Numer katalogowy	306196
Kod producenta	306196
Kod EAN	8581703061960
Producent	XRAY Racing

Opis produktu

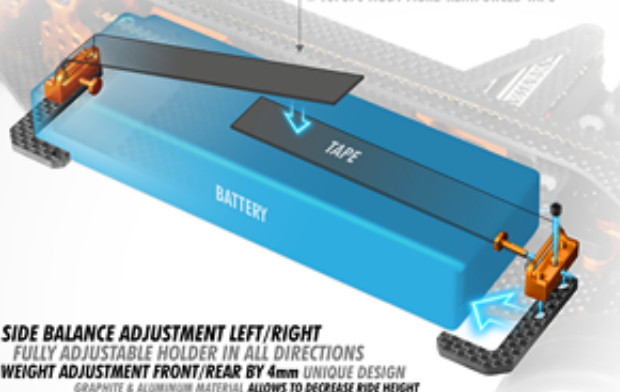

Fully adjustable aluminum battery holder allows to move the batteries in all directions - front/rear and also left/right. The adjustable battery holder allows for easy and comfortable weight transfer adjustment. The front/rear weight balance can be adjusted in 4mm range.

The battery holders allow to mount the battery tape over the top of the battery only without the instalment of the tape under the chassis which allows increased flex of the chassis and as such helps to generate more traction. Thanks to the chassis-free instalment of the tape the ride height of the car can be slightly decreased as there is no more tape under the chassis.

The adjustable holder and the battery backstops are CNC-machined from lightweight aluminum and the battery holders are machined from premium lightweight graphite material.

FULLY ADJUSTABLE BATTERY HOLDER

CHASSIS-FREE TAPE INSTALMENT INCREASES CHASSIS FLEX & INCREASES TRACTION
#107870 HUDY FIBRE-REINFORCED TAPE
