Kod EAN	8581703211099
Producent	XRAY Racing

Opis produktu

The chassis features bent sides for improved weight balance and increased traction with maximum stability of the car. The rear part of the chassis is narrower.

After extensive testing of 25 different chassis designs, the final concept was selected for its flex characteristics and layout to produce the best balance of traction and stability.

CNC-machined from high-quality 2.5mm Swiss 7075 T6 aluminum, the lightweight chassis retains the necessary strength and rigidity, and is black coated at XRAY's own in-house fully robotic coating line.

Universal for both Dirt and Carpet edition.

There are three different lengths of chassis available each suitable for particular track conditions.

Fits:
XRAY XB2'20
XRAY XB2'21
