Opis produktu

The XB8 chassis was redesigned to fit both SOFT and HARD composite radio boxes without chassis modification.

The front and rear downstop screw areas were redesigned and repositioned for improved suspension down travel and increased reliability. The engine was moved more rearwards.

The chassis is CNC-machined from 3mm high-quality Swiss 7075 T6 aluminum; strategically machined in low-stress areas and then anodized to make it as light as possible without affecting strength or rigidity
