Opis produktu

Molded composite C-hub for steering block. Caster pre-set at 6°. The roll center position can be easily and quickly adjusted by inserting different thickness of shims on the top of the caster block between the block and the vertical ball stud. The caster block features large opening for quicker & easier assembly/disassembly of the CVDs. The entire CVD assembly can be easily inserted/removed through the C-hub without the need for disassembly. The large opening also prevents collision of the CVD with the C-hub in serious crashes.
